

Pro Care – Carpet Cleaner

A safe, natural based surfactant cleaning concentrate designed for professional yet gentle maintenance of all carpet and fabric upholstery.

- A low pH formula makes it safer to use on carpet.
- No aggressive chemicals making it occupationally safe to use.
- Natural solvents efficiently solubilise and remove greasy soils.
- Natural essential oils leave a wonderful freshness throughout treated areas.
- Concentrated formula delivers outstanding economy and reduces landfill potential.

FEATURES	BENEFITS
Low pH	<ol style="list-style-type: none"> 1. Safer to use - safer on fabrics 2. Cleaning solution will not strip colour from fabrics during cleaning when used as directed 3. Great for use in commercial applications, reduces OH & S risks
Concentrated formula	<ol style="list-style-type: none"> 1. Excellent economy for domestic use - twice the concentration of normal household carpet cleaning formulations 2. Excellent for use as a spot-spray or in extraction cleaning machines 3. Professional yet gentle maintenance of all carpet and fabric upholstery
Natural solvents	<ol style="list-style-type: none"> 1. Small additions of natural orange oil efficiently solubilise and remove greasy soils 2. Soils are drawn from deep within the carpet pile to the surface for easy removal by wet-vacuum
Clever deodorising formula	<ol style="list-style-type: none"> 1. Special deodorising molecules absorb bad or stale odours that often emerge during the cleaning operation 2. Pro Care's delicate fresh floral bouquet fragrance leaves a very pleasant, fresh fragrance throughout the house 3. Gentle on sensitive noses

- Low pH - safer in use
- Provides a deep clean
- No aggressive chemicals
- Excellent economy

Directions for use:

Note: Carpets should be tested in an inconspicuous area to ensure colour fastness prior to treatment.

Spot cleaning - dilute 10mL into 500mL spray bottle and fill with water. Spray onto carpet and 'spot' in with clean cloth.

Extraction cleaning - dilute 7mL per Litre of water for general use.

Pre-spray - dilute 30-50mL per Litre of water. Spray over area before extracting.

* Number of Litres based on usage of 10mL per 500mL spray bottle.

Contains NO:

caustic alkalies, fillers or extenders, petroleum by-products, SLS, toxic colours or fragrances, chlorine, ammoniates, EDTA, parabens, or formaldehyde.

INGREDIENTS
