'Easy Being' March 09 WHOLESALE e-newsletter

Greetings subscribers. Our thoughts are still very much with everyone touched by the recent bushfire tragedy in Vic. **What can we all do to help?** Besides donating money & resources, it is easy to feel helpless in the face of such tragedy. **However there is another, much larger scale at which we can all help.**

It is known that Climate Change will bring about more—and more severe— natural events such as this tragedy. So I urge you all to **make this your motivation to live—and conduct your business—as sustainably as you can, and encourage all around you to do the same.** As a business or organization, you have the opportunity to make a big difference with your choices. Congratulations on the choices you have already made— and please keep adding to them.

- **If you have not already—switch to 100% green power for your business.** The cost to you is miniscule compared to the cost to people suffering now—and who will suffer in the future—as a result of Climate Change.
- There are so many other ways your purchasing and other choices can help I cannot list them all. Encourage car pooling, support local business and industry, buy recycled and recyclable, be carbon neutral...

Be prepared for your business to pay more for a product that will not pollute the earth, such as green energy. Make the mental connection that your business choices effect our planet, even if you can't see the direct link. Think about everything you do and influence everyone you can so we can collectively slow the warming of our planet.

This is what we can do to help reduce the chance of similar tragedies occurring again.

Wholesale customers please note:

- Wholesale price list available on request
- Minimum purchase of \$500 applies (let us know if this poses a problem)
- Pre-payment before despatch requested
- To order: either call or email us, or login to website and use shopping cart (when logged in, wholesale pricing shows instead of retail). Any problems, contact us...

Spotlight on...Future Switch

Save on standby power by using the **Future Switch** to **turn all your computers, printers, modems and other electrical equipment off standby power with the press of one button.** Easy to set up, flexible (can have multiple remote controls), you need never accidentally leave machines on overnight again.

News & products march 09

- We have found a new supplier for **cornstarch shopping bags**; many of you have been waiting for these and we hope supply will no longer be any problem.
- **Biobags** will be on the shelves within a week; each roll in a box. Sizes: 10 litre, 20, 30, 50 and 80 litres. These are thinner than the ones we have had til now; this means they are a bit cheaper but not as strong.
- We will also keep stocking the bulk boxes of **cornstarch bags** we have always had; these are commercial strength and excellent for business purposes.
- **Cornstarch Cutlery:** pricing will be dropping significantly; the style is a bit different and does not have the word 'biodegradable' on it (unfortunately) but is still made from cornstarch.
- **LED spotlights** should be back on the shelves in a couple of weeks; an ideal replacement to standard floodlights.

March wholesale subscriber specials

1. Buy a box of PLA compostable **straws** (10 000) and receive a packet of napkins (500) and a twin pack of kitchen towels (70 sheet) at no extra cost (value \$12.55)
