SALES PITCH

"If you want to live a more sustainable lifestyle, give Going Green Solutions a visit"

Hurstbridge's Going Green Solutions has sustainable products for every aspect of your lifestyle.

Who's behind the counter?

Wife-and-husband team, Lucinda and Sean Flynn, started out in 2007 with a home business and moved into a shop in 2010 when their customer base continued to grow. "We know lots of people here and have always wanted to offer a hub where people can come and not just find green products but also ask questions about sustainability, energy efficiency, green living and how to find green tradespeople," Lucinda says.

What's in store?

Sustainable, green options for pretty much everything – meal times, offices, workshops, laundry, family games, pet care, garden and compost supplies or camping.

Who's buying?

There's two sides to the business – retail and wholesale – which means a varied clientele. "We do everything from walk-ins looking for a gift ... right through to catering for places like the Queen Vic Market, the Convention Centre and Vue de Monde." ●

Our pick

The Ensopet Pet Waste Composting System. Rather than throwing dog droppings in the bin, where they contribute to landfill and create methane, install an Ensopet and hygienically compost dog waste in your garden. Beneficial micro-organisms will quickly break down pet waste so you keep all the nutrients, while at the same time eliminating smell and helping to remediate pathogens. \$72
